# Flight Log Description

**Log ID:** 3934011

☐ **Obfuscate?**

**Contributor:** Jack Hill

☐ **Crashed?**

**Incident Description:**

An America Hexcopter took off in GUIDED mode (red) and was directed to fly to a waypoint immediately North West of its launch position. Instead, after an initial attempt to fly North, it headed South East. At that point, the RPIC issued a LAND command (green) followed by a HOVER command (purple) both of which were ignored. The RPIC then attempted to take manual control of the sUAS, and again issued an RTL (blue) command followed by a land command (green) directly from the hand-held controller -- both of which
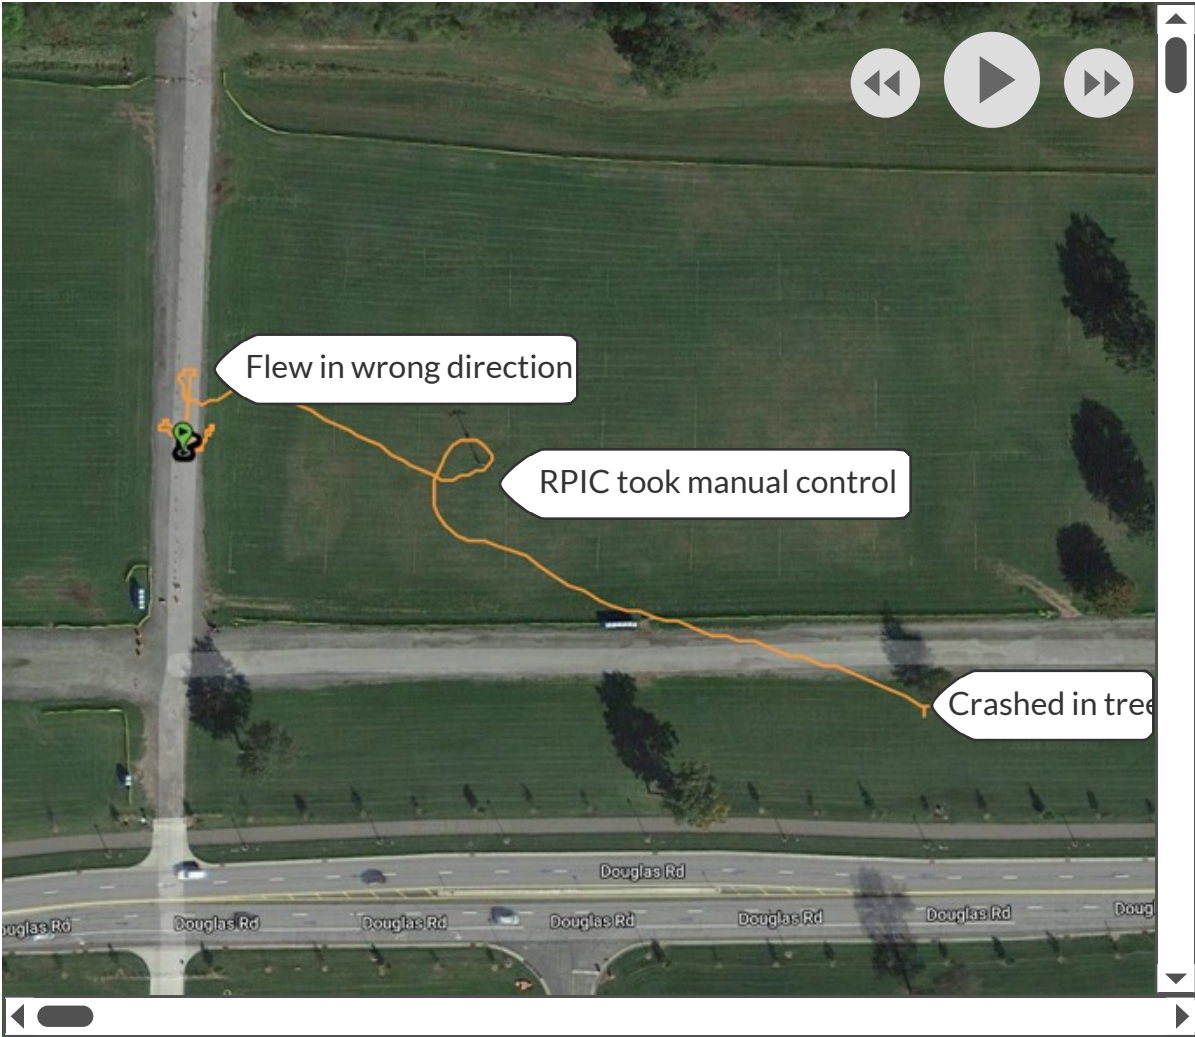

sUAS Type ▼

Autopilot Type ▼

Ground Control Station ▼

**Possible causes:**

Unsure - but possibly a faulty magnometer. Also the area we were flying in has strong interference from local airport radar.

**File upload:** Log file to upload ▼
